## Notes Referred to Specific Signs on Standard Drawings SL-1 to SL-7:

- This sign shall only be used on the New Jersey Turnpike.
- This sign shall only be used on the Garden State Parkway.
- This sign shall not be permitted to be installed alone. It is to be installed below another regulatory sign such as a R-5 or a R-5-4 sign.
- This sign is not permitted to be installed approximately 45 degrees to oncoming traffic unless otherwise directed.
- This sign is not permitted to be installed alone. It shall only be permitted below the R-7 sign installed.
- A MS-BP or MS-BP supplemental plaque may be installed below this sign.
- This sign is not permitted to be installed alone. It is intended to be installed below a R92226 or a R922276.

## General Notes for All SL Drawings:

1. All ground mounted signs on the Garden State Parkway shall be supported on wood posts. Ground mounted signs greater than or equal to 50 ft high shall be supported on wood or aluminum posts as directed by the Engineer. Mile markers and delineators shall be supported on U-channel posts. All other ground mounted signs less than 50 ft. shall be supported on wood posts.
2. The authority does not sign for 1-digit, 2-digit, 600 series, 700 series or 800 series county routes.
4. The authority does not sign for 1-digit, 2-digit, 600 series, 700 series or 800 series county routes.
5. All signs shall have the aluminum trimmed from the rounded corners of the flat sign panels where practical.
6. All signs are to receive retroreflective sheeting meeting standard specification section 912.02.
7. When not used in a dimensional table, the dimension "m" herein signifies "margin" whereas that legend is optically balanced about the vertical axis and resulting in equal left and right margins.
