***2004 Standard Supplemental Specifications  
Removable Wet Weather Pavement Marking Tape***

**DCA2006SS-03**

**January 11, 2006**

**Subject: Revisions to Subsection 516.04, Part (H); Temporary Pavement Striping and 920.10**

These revisions incorporate the use of Removable Wet Weather Pavement Marking Tape on Authority Construction Contracts.

**Instructions to Designers and Consultants**

Effective immediately, all contracts shall incorporate the revisions listed herein. For advertised contracts awaiting the opening of bids these revisions shall be incorporated via addendum. Contact your NJTA Project Manager for instruction.

Designers may access these revisions in the Standard Supplemental Specification, which is available on the following Authority Web Page: <http://www.state.nj.us/turnpike/nj-buss.htm>

**Information for In-House Staff**

The product listed in this specification has an operational temperature limit of 40 degrees. If this specification is being used on a project in early spring/late fall it is recommended that the Operations Department be contacted for possible daytime tape only placement.

It is also recommended that the Engineer responsible for construction provide the construction supervision personnel access to the product information in CapEx. This information is available in the Contracts and Regulations folder found on the S: drive. Please note that in the majority of conditions found on our roadways, the product should be placed with a primer.

The specification revisions have been incorporated into the Standard Supplemental Specification, which is available in the S: / drive. Please distribute the information to your Project Managers and have them direct their consultants appropriately.
