2004 Standard Supplementary Specifications

DCA2010SS-23

Air Entrainment for Self-Consolidating Concrete

September 3, 2010

**Subject: Revisions to Section 437 Self-Consolidating Concrete (SCC) for
Drilled Shafts, Subsections 437.02 Materials and 437.03 Mix
Requirements**

The following changes to the specifications pertain to contracts that require self-consolidating concrete for drilled cast-in-place concrete shaft construction.

Instructions to NJTA Staff, Designers and Consultants

Effective immediately, all contracts currently in the design phase shall incorporate the revisions listed herein. For advertised contracts awaiting the opening of bids this revision may be incorporated via addendum. Contact your NJTA Project Manager for instruction. Attached revision is noted in *italics*.

Designers may access these revisions in the Standard Supplementary Specification, which is available on the following Authority Web Page: <http://www.state.nj.us/turnpike/professional-services.html>
These additions have been incorporated into the 2004 Standard Supplementary Specification, which is available on the S:/drive. Please distribute the information to your Project Managers and have them direct their consultants appropriately.
