

2017-3.1 New Fields on the Waterway Form

Several New fields have been added to the form as noted below.

1. COUNTERMEASURES now includes a checkbox to be checked when scour countermeasures are present at a structure and a “Defect” subgrouping was added to code defects as needed.
2. Additional defects have been added to the Waterway / Channel subgrouping, they include Undermining and Stream Alignment, and Debris in channel has been separated into Natural Debris in Channel (which includes silt, sedimentation, leaves, fallen trees, etc.) and Pollution / Dumping.

The screenshot displays the 'WATERWAY/CHANNEL' form. A red arrow labeled '1.' points to the 'COUNTERMEASURES' section, which includes a table with columns for 'N/A', 'A', 'B', 'D', 'QTY', and 'Photo'. The 'Defect' checkbox is highlighted. Another red arrow labeled '2.' points to the 'WATERWAY/CHANNEL' section, which includes a table with columns for 'N/A', 'A', 'B', 'D', 'QTY', and 'Photo'. The 'Undermining', 'Stream Alignment', 'Bank Erosion', 'Gabion Damage', 'Natural Debris in Channel', and 'Pollution/Dumping' checkboxes are highlighted. The 'FENDER SYSTEM' section is also visible at the bottom. On the right side, a 'Forms' sidebar lists various form categories, with 'Waterway' highlighted in blue. The Windows taskbar at the bottom shows the date as 5/31/2017 and the time as 7:49 AM.
