

**New Jersey Turnpike Authority
Newark Bay-Hudson County Extension Improvements Program
Interchange 14 to Interchange 14A**

Bayonne Public Information Center Announcement

At the New Jersey Turnpike Authority, driver and community safety and relieving traffic congestion and its negative impacts are top priorities. To advance those important goals the NJ Turnpike Authority is undertaking a critical modernization and safety program to rebuild the Newark Bay-Hudson County Extension (Extension). The NJ Turnpike Authority will hold the program's second open house, formally referred to as a Public Information Center, to provide residents, public officials, and the small business community with information on the Newark Bay-Hudson County Extension Improvements Program (the Program).

Join us on:

Tuesday, May 28, 2024

6:30-8:30 PM

Woodrow Wilson School #10

101 W 56th St., Bayonne, NJ 07002

Participants will have one-on-one opportunities to speak directly with members of the Program team and ask them questions, visit information stations, learn about employment and small business opportunities, and view a short presentation from the NJ Turnpike Authority at 7:00 PM. All are welcome. Public parking is available in the school lot. Doors will open at 6:30 PM.

The Program will modernize the Extension to help ensure its safety and sustainability, relieve traffic congestion and its harmful impacts, accommodate the current and future growth of the adjacent communities and the ports, and address the anticipated impacts of climate change. The Program's first project is the reconstruction between Interchange 14 in Newark and Interchange 14A in Bayonne and Jersey City. The first project includes the replacement of the Vincent Robert Casciano Bridge, known as the Newark Bay Bridge, with new twin cable-stayed bridges. Construction for the Program's first project is scheduled to begin in 2026 and last approximately 10-years. Future open houses will be scheduled for subsequent projects.

This is an open house, not a public hearing. It is intended to encourage greater engagement, dialogue, and interactivity. Interpreters will be on hand to assist in Spanish, Tagalog, Arabic, and Polish. Please visit our Program website nbhce.njta.com for more information on the Program, to view our Virtual Public Information Center, to ask a question or provide a comment, and to pre-register for the in-person Bayonne Public Information Center.
